SINGLE USE LARYNGOSCOPE SYSTEMS

Timesco: The U.K.’s No.1 Laryngoscope Brand
For over 50 years, Timesco have been at the forefront of medical product design and innovation. As a manufacturer and supplier of products for the Anaesthesia, Surgery, Podiatry and Primary Care markets, we have an unrivalled portfolio supplying both the UK directly and internationally through over 60 distributors.

As a family owned business, with headquarters in Basildon England, we strive to deliver products made to an exceptionally high standard; exceeding internationally recognised quality standards and customer expectations. We are recognised as one of the most progressive and innovative companies within the industry and have a dedicated Product Development Team which focuses on the changing needs of our clients and advances in clinical practice.

At Timesco we pride ourselves on our comprehensive range of laryngoscope blades and handles. We have been successful in changing the market place with the introduction of Europa, the first metal single use blade in 2004. We have been awarded with the highly acclaimed German iF Award and the Chicago Athenaeum 2014 Good Design Award. We also hold a number of international patents.

Our reputation as the leading supplier of single use laryngoscopes is built on a customer focused dedication to service and support.
supply chain & distribution

To facilitate our customers on an individual basis we endeavour to deliver products through various channels such as NHS Supply Chain, Bunzel and Squadron within the UK and through our global network of Distributors.

If ordering via NHS supply chain, National Product Codes (NPC) are listed throughout the brochure (where applicable).

For a list of our international distributors please visit www.timesco.com/worldwide.

quality

From concept through to design and manufacture our aim is to deliver products made to exceptionally high standards. At our UK headquarters we have direct control over our quality, processing and dispatch of all goods in accordance with ISO 9001 and ISO 13485.
There are blade measurements listed throughout this brochure. The blades are measured as illustrated in the image on the right.

The single use sets are supplied with a blade and handle ready to use in the same pouch for convenience.
Cross infection is now a major concern throughout all aspects of medical care.

With the growing problems surrounding resilient virus strains and prions, guidance by the Association of Anesthetists of Great Britain and Ireland (AAGBI) recommends reusable devices to be reprocessed or single use variants to be considered (see Infection Control in Anaesthesia 2nd Edition, 2008).

Single use airway products are now a vital part of combating infections in anaesthesia.

Over the past few years, Timesco have pioneered the development of single use laryngoscope blades that provide unrivalled clinical performance. Our Europa and Callisto single use metal blades are recognised as the No.1 systems throughout the U.K. and are used as the blades of choice in most major U.K. hospitals.

Despite their limited life, all our single use products are designed and manufactured to provide the highest level of clinical performance, without compromising patient care, and yet they are economical enough to be disposed of after use.

We don’t compromise on quality, why should you?
Timesco’s green fitting Callisto LED handles have exceptional specifications to reduce cross infection at a cost low enough to justify single use. Available preloaded with button cells or for use with dry cell batteries.

- Powerful, bright LED bulb for excellent illumination with a typical output of at least 11,000 lux from the LED when measured 2cm from the LED.
- Low volume plastic construction to reduce cost, plastic waste and cost of disposal.
- Metal hook bar offering exceptional strength for a single use handle.

The dry cell version (A - DS.3940.470.10) requires 2 C size dry cell batteries, not supplied with the handle.

The preloaded medium (B - DS.3940.480.10) and the preloaded compact versions (C - DS.3940.460.10) are supplied with alkaline button cell batteries for convenience. They are easy to remove for quick and safe battery disposal after use. The battery expiry date is clearly marked on the back of the handle.

- Clearly marked as single use on the base of the handle.

ISO 7376 compatible
Single Use
Latex Free
CE marked

Callisto is the U.K’s No.1 single use laryngoscope system. It has been designed to offer a true low cost alternative to reusable blades and handles with exceptional specifications to reduce cross infection, cost, maintenance and processing costs.

- **Rigid metal spatula** looks and feels like a reusable fibre optic blade.
- **Highly polished 4mm acrylic core** for maximum illumination.
- **No touch hook** prevents the blade from touching the handle so reusable handles will not get contaminated.
- **Green ISO 7376 fitting plastic block** compatible with green fitting single use handles and reusable handles.
- **2 metal ball bearings** for secure fitting.
- **Single use logo** clearly marked on the blade.

Callisto Eclipse blades have a lever and a tilting tip to assist with difficult intubations. The tip elevates the epiglottis with minimal force and reduces the possibility of damage to teeth.

- Highly polished 4mm acrylic core for maximum illumination.
- Rigid metal spatula looks and feels like a reusable fibre optic blade.
- No touch hook prevents the blade from touching the handle so reusable handles will not get contaminated.
- Green ISO 7376 fitting plastic block compatible with green fitting single use handles (pages 6-7) and reusable handles.
- 2 metal ball bearings for a secured fit.
- Lever positioned at the rear of the blade to control the tilting tip.

- Tilting tip for elevation of the epiglottis, providing an improved view of the larynx, without excessive force.

- Iso 7376 compatible
- Single Use
- Latex Free
- CE marked
- Supplied with comprehensive instructions
- Compatible reusable & single use handles are colour coded

Green fitting single use laryngoscope blades

timesco.com | +44 (0)1268 297710
Difficult intubation

The tilting tip on the Eclipse blades allows greater flexibility and control during many difficult intubation cases. Such as cervical spine and neck injuries, prominent upper teeth and displacement of the larynx.

Compatibility

All Callisto blades are compatible with all Timesco single use and reusable green ISO 7376 fitting handles.

See pages 6 - 7 for compatible single use handles.

Freeway is a fibre optic range of fully plastic laryngoscope blades available in a range of Macintosh and Miller sizes.

- Highly polished 4mm acrylic core provides excellent illumination.
- Green ISO 7376 fitting plastic block compatible with green fitting single use handles (pages 6-7) and reusable handles.
- Green O ring providing clear indication of fibre optic fitting.
- Full plastic construction allows for a very low cost system and the rigid plastic provides minimal flexion of the blade.

**Specifications:**

Timesco’s Europa E handles have exceptional specifications to reduce cross infection, at a cost low enough to justify single use. Compatible with standard light, conventional disposable blades. Available preloaded with button cells or for use with dry cell batteries.

- Clear product branding with the CE mark and single use symbol on the head of the handle.

- Low volume plastic construction reduces plastic waste.

- Supplied in boxes of 10 in convenient peel pouches.

- Standard light, conventional ISO 7376 fitting compatible with conventional fitting single use blades (page 18 - 21).

- Available as a dry cell version to include 2 C size dry cell batteries (A). Batteries are not included with the handle.

- Also available preloaded with button cells (B), for use with Europa LED blades only. The batteries can not be removed.

- CE marked

- Single Use

- Latex Free

- ISO 7376 compatible

- Supplied in boxes of 10
Europa is the U.K’s No.1 standard light, conventional single use laryngoscope system. The bulbs are housed in the blade, not the handle. The range is a low cost alternative to reusable blades and handles with exceptional specifications to reduce cross infection, cost, maintenance and processing costs.

- Fixed bright bulb with focused illumination. Also available with an LED bulb, which emits minimal heat.
- The bulbs do not obstruct the view of the airway. Single use logo clearly marked on the blade.
- Rigid metal spatula similar looks and feels like a reusable fibre optic blade.
- No touch hook prevents the blade from touching the handle so reusable handles will not get contaminated.
- Standard light, conventional ISO 7376 fitting compatible with conventional fitting single use (pages 16 - 17) and reusable handles.
- 2 metal ball bearings for secure fitting.

Our green fitting Callisto and standard light Europa sets are available direct from Timesco and via NHS Supply Chain.

The single use sets are supplied with a blade and handle in the same pouch for convenience, providing a complete solution.

The sets containing the preloaded handle offer a complete, ready to use system as it does not require you to add batteries.
